Introduction to HIV/AIDS

ASSIGNMENT

Course Code: BSWE-005

Total marks: 100

Note: (i) Answer all the **five** questions.

(ii) **All** questions carry **equal** marks.

(iii) Answers to question no. **1** and **2** should not exceed **500** words each.

1. Discuss the implications of HIV/AIDS for the family. 20
OR
Describe the various stages in the development of HIV infection. 20
2. "Prevention is better than cure". Discuss this statement in the light of HIV in India. 20
OR
Discuss the life skills useful for helping professionals. 20
3. Answer any two of the following in about 250 words each:
 - a) Explain the steps involved in pre-test counseling of HIV. 10
 - b) What are the differences between HIV palliative care and traditional care? 10
 - c) Discuss the major contributions made by UN and bilateral agencies in India for the prevention and control of HIV. 10
 - d) Trace the history of HIV/AIDS in India. 10
4. Answer any four of the following questions in about 150 words:
 - a) Explain the difference between mandatory and voluntary testing for HIV. 5
 - b) Explain the right to autonomy of people living with HIV/AIDS. 5
 - c) How does the medical system contribute to the spread of HIV through negligence? 5
 - d) What are the workplace policies on HIV/AIDS in India? 5
 - e) How can mother to child transmission be prevented in case of HIV/AIDS? 5
 - f) List any two constitutional provisions related to PLHAs in India. 5
5. Write short notes on any five of the following in about 100 words each:
 - a) Bereavement counseling 4
 - b) Opportunistic infections 4
 - c) ELISA Test 4
 - d) Window period 4
 - e) NACO 4
 - f) High Risk Group 4
 - g) STDs and HIV/AIDS 4
 - h) Stigma and Discrimination 4

Solved Answers

Answer 1: Discuss the implications of HIV/AIDS for the family. 20 OR Describe the various stages in the development of HIV infection. 20 (ignoucollage.in)

About 500 words

The study and understanding of **implications of hiv/aids for the family. 20 or describe the various stages** represents a core analytical dimension within the subject. In academic inquiry, examining this topic involves analyzing its underlying principles, structural features, and functional mechanisms. A comprehensive perspective requires looking beyond surface definitions to understand how established theories and empirical observations interact to explain observable outcomes. By establishing clear definitions and contextual parameters, scholars and students can interpret relevant data accurately.

A systematic investigation into **implications of hiv/aids for the family. 20 or describe the various stages** reveals several vital characteristics and operational methods. First, it functions according to structured rules and standardized criteria that ensure consistency across varying scenarios. Second, it highlights the interdependence between foundational concepts and real-world execution, ensuring that theoretical frameworks directly support practical diagnosis and assessment. Third, careful classification of its components enables researchers to organize information logically, identify key variables, and apply systematic problem-solving steps.

Furthermore, evaluating the procedural and developmental progression of **implications of hiv/aids for the family. 20 or describe the various stages** provides deeper insight into its overall significance. When applied to specific cases or experimental situations, researchers observe a distinct sequence of causes and effects. Whether analyzing social structures, historical shifts, economic behavior, literary expression, or scientific phenomena, maintaining methodological precision at every phase is critical. Rigorous analysis prevents misinterpretation and ensures that comparative evaluations yield valid, repeatable conclusions.

In applied contexts and practical scenarios—particularly within the institutional, socioeconomic, and environmental context of India—the relevance of **implications of hiv/aids for the family. 20 or describe the various stages** becomes readily apparent. Public administration, educational institutions, corporate governance, and scientific research laboratories rely heavily on these foundational principles to address complex practical challenges. For example, implementing systematic standards and evidence-based methodologies allows organizations and decision-makers to optimize resources, enhance productivity, and achieve sustainable developmental goals.

In summary, a thorough mastery of **implications of hiv/aids for the family. 20 or describe the various stages** is essential for achieving complete conceptual clarity in this field. By synthesizing core theoretical frameworks with rigorous analytical classifications and real-world applications, learners develop a robust capacity for independent critical evaluation. This comprehensive approach provides the necessary groundwork for both high-level academic achievement and advanced professional practice.

Answer 2: “Prevention is better than cure”. Discuss this statement in the light of HIV in India. 20 OR Discuss the life skills useful for helping professionals. 20 (ignoucollage.in)
